

List of Allergens

【☉】 Contains allergens

【△】 It is shared in the cooking equipment and production line at the store and central kitchen.

①Regarding allergens, this information is based on the Food Sanitation Act, covering the 8 'designated ingredients' and the 20 'ingredients equivalent to designated ingredients,' for a total of 28 items. The investigation traces back to the raw materials, and this is what has been documented.

②While we take the utmost care during manufacturing and processing at the factory, as well as during cooking at the store, there is a possibility that trace amounts of other allergens may be unintentionally mixed in through cooking utensils or similar means.

③There are individual differences in sensitivity to allergens, and even trace amounts of contamination may trigger a reaction. Ultimately, we ask that you consult with a medical professional and make your own judgment.

④The nutritional values are calculated based on the figures from the testing agency and the '7th Edition of the Standard Tables of Food Composition in Japan.' Please note that these are standard values, and since each item is handmade at the store, there may be slight variations in the actual values.

⑤The menu and ingredients will be updated as soon as any changes occur. Please check for the latest information.

Out of the 20 ingredients equivalent to designated ingredients, the following 9 items—yamaimo, abalone, squid, salmon roe, salmon, kiwi, banana, cashew nuts, and macadamia nuts—are not used, and have been removed from the list

商 品 名			8 Designated Ingredients							11 out of the 20 ingredients equivalent to designated ingredients.											Items that contain allergens and require allergen labeling
